

D.O.V.A.

Digital Orchestration of Vehicle Authorization

AFTER THE SALE

Post-Sale Options for Your Business and Your Customer

When a vehicle sells, DOVA gives you and your customer a clear set of options. No loose ends. No surprises.

YOUR BUSINESS OPTIONS

What you can do with the module after the sale

REDEPLOY

Remove & Redeploy

Remove the module and reinstall on your next incoming vehicle. It auto-enrolls to the new VIN at power-on. Zero reconfiguration required. Full fleet ROI on every module.

RETAIN

Hold Through PDI

Keep the module installed through the pre-delivery inspection. Continue monitoring GPS and diagnostics until keys are physically handed to the customer.

SELL WITH CAR

Transfer to Buyer

Offer the DOVA module as a value-add with the sale. Transfer the vehicle to a customer account. A differentiator that turns a standard handoff into a premium experience.

YOUR CUSTOMER'S OPTIONS

What your customer can choose at delivery

CLEAN DELIVERY

No Module

Module removed before delivery. Customer receives their vehicle with no DOVA hardware. Clean, simple, and standard.

PERSONAL USE

DOVA Personal Account

Customer activates a personal DOVA account — GPS tracking, remote lock/unlock, and vehicle health monitoring as a monthly subscription.

BUSINESS USE

DOVA Business Account

If the customer operates a fleet or business, they onboard the module into a DOVA business account with full fleet features active from day one.

Every option is managed from the DOVA web dashboard. No phone calls, no manual transfers, no paperwork.
